RE: 9-1-1 Address Assignment

Dear Sir/Madam:

Based on the description provided during our recent conversation, the Central Texas Council of Governments has determined the correct address for your property is as follows:

2272 County Road 421, Hamilton County, TX 76525

This is the address you should use for utility or telephone services, voter registration, county records, general construction permits, and delivery services for this location. This address needs to be prominently displayed at the entrance to your property in a manner where it is visible from the road. If you intend on receiving mail at this location, please contact your local post office to determine your postal community.

Zip code assignment for your postal community is based on Zip Code Tabulated Area information (ZCTA's) sourced from the U.S. Census Bureau. ZCTA's are an estimation of a zip code area and may not be correct for your mailing/delivery address assignment. In order to verify if the assigned zip code is correct, please contact your local post office for verification.

If the location of your driveway should change or any other changes/additions occur that may require additional assignment(s) or verification of this assignment, contact our offices so we can assist you.

Should you have any questions concerning this address, please feel welcome to call or email.

Sincerely,

Jennifer Seastrunk
Addressing Coordinator
